SUMMARY

Software Engineer with 1.5+ years building Backend heavy full-stack applications and AI-integrated enterprise systems on Azure. Built an AI copilot deployed to 13,000+ Microsoft employees and a unified data portal with React/.NET serving 100+ workspaces. Published npm package with 700+ weekly downloads. Fabric Analytics Engineer certified.

EDUCATION

B.Tech in Computer Science and Artificial Intelligence

Dr. A.P.J. Abdul Kalam Technical University

PSIT College of Engineering, Kanpur, Uttar Pradesh

Graduated: June 2024

8.5 CGPA

TECHNICAL SKILLS

Frontend & Backend: React.js, Next.js, .NET/C#, Node.js, Express.js, Spring Boot, REST APIs, TypeScript, RabbitMQ, Redis, MongoDB, Docker, Swagger, Python

AI, Cloud & Databases: LangChain, Multi-Agent Systems, Copilot Studio, RAG, Microsoft Fabric, Azure SQL, Entra ID/MSAL, PySpark, Git, PostgreSQL, Cosmos DB

PROFESSIONAL EXPERIENCE

MAQ Software, Hyderabad — Software Engineer

Jan 2025 – Present

- Built **PRISM Portal** (React.js + .NET 10), a unified enterprise platform consolidating **100+ Power BI workspaces** into a single searchable interface – frontend with dynamic workspace browsing, embedded Power BI rendering via **Fabric SDK**, and AI-powered natural language querying with auto-generated charts and trend analysis.
- Designed PRISM's **backend and data layer** – Entra ID/MSAL authentication (plus WAM broker for local development), Redis caching, pagination, and rate limiting; built a **PySpark metadata pipeline** scanning 100+ workspaces for dataset schemas and lineage, loaded into a **DataMart schema in Azure SQL** that replaced hundreds of live Fabric API calls with a single centralized store deployed over Azure app services via kudu.
- Architected **Athena**, a multi-agent AI copilot for **13,000+ Microsoft employees** – built a Copilot Studio orchestrator routing queries to 4 Fabric Data Agents (KQL, Lakehouse, Semantic Models); secured via Entra ID with RAI/DLP/SDL compliance. **Received direct client appreciation.**

HashedIn by Deloitte, Bengaluru — Software Engineer Trainee

Oct 2024 – Jan 2025

- Built a **multi-agent AI system using LangChain** for end-to-end SDLC automation – designed agent orchestration with tool-calling, memory, and chain-of-thought prompting to handle requirement analysis, code generation, test case creation, and code review workflows, **reducing manual development effort** across the team.
- Built a **Secrets Management System** using Spring Boot and PostgreSQL – developed REST APIs with JWT authentication and role-based access control, implemented encrypted secret storage with versioning, rotation, and secure access policies; achieved **90%+ code coverage** with automated unit testing.

PROJECTS

Airline Management System ↗

Oct 2023 – Feb 2024

- Built 5 Node.js microservices: **API Gateway** (rate limiting, reverse proxy), **Flight Search** (Sequelize ORM, filters), **Booking Service** (RabbitMQ async messaging), **Reminder Service** (Cron + Nodemailer), **Auth Service** (JWT, RBAC). Implemented inter-service communication using Axios via RabbitMQ, centralized error handling, and database migrations with Sequelize.

CERTIFICATIONS & ACHIEVEMENTS

Microsoft Certified: Fabric Analytics Engineer Associate (DP-600) ↗

basic-backend-setup – npm Package (700+ weekly downloads) ↗

EVANS – VS Code Extension (150+ downloads) ↗ & CODE – Chrome Extension (500+ downloads) ↗ ↗
